PROFILE SUMMARY

Motivated final-year BSc Information Technology student with a strong academic record and hands-on programming experience across multiple languages and frameworks. Passionate about cybersecurity and penetration testing, with a solid foundation in data structures, system design and database management. Collaborative and detail-oriented, with proven experience tutoring peers and delivering group software projects on time.

WORK EXPERIENCE

Student Assistant & Tutor — North-West University, Potchefstroom 2025 – Present

- Tutor students in Introduction to Computing and Programming (Python), User Interface Programming (C#), System Analysis and Design, and Data Structures and Algorithms (Java).
- Support academic staff by explaining core programming and systems concepts to first- and second-year students.

Group Leader — System Analysis Project (CMPG221 / CMPG223) Feb 2025 – Oct 2025

- Led a team through a full system analysis project, using C# and relational database management.
- Designed and implemented database-driven applications applying object-oriented programming and software development methodologies.

NOTABLE PROJECT

Rehabilitation Management System

- Designed and built a system to support rehabilitation service management, applying database design and information security principles.
- Applied database design principles using SQL to ensure secure and efficient data management.

Fitness Tracker Application

- Designed an application that helps users to track workouts, monitor fitness progress and manage personal health goals.
- Designed features for recording exercise sessions and viewing progress over time.

Student Management System

- Developed a student management system for handling student registration, course enrolment, attendance, & grades.
- Designed a relational database to store and manage student information efficiently.

EDUCATION

BSc in Information Technology — North-West University Jan 2024 – 2027 (Final Year)

- Coursework covers databases, systems analysis and design, data structures and algorithms, and information security.

SKILLS & COMPETENCIES

Programming Languages: Python, C#, C, C++, Java, SQL, ASP.NET

Web Technologies: HTML, CSS, JavaScript, React.js

Core Competencies: Object-Oriented Programming, Debugging & Problem Solving, Database Management, Data Structures & Algorithms, System Analysis & Design, DevOps Fundamentals.

Languages Spoken: English, Portuguese, Setswana and Tsonga.

Tools: MS Excel, MS Office

PERSONAL ATTRIBUTES

- Collaborative team player with a strong willingness to learn from peers and contribute to group success.
- Highly detail-oriented, with a consistent focus on precision and delivering high-quality results.
